

The Grand Bargain Email Message and Standard Notations

Why would a business do this (Create a 1,000,000 email march suggesting there is a grand bargain for improvement between the schools and community) ? This is: The private sector gives a gift that keeps on giving and influences at risk mother, child, and mentor to make certain the age 0-6 child is really ready to read, count, and understand positive expectations before kindergarten. At risk for this purpose influences mom to define if her child is at individual risk . The local positive expectation is that 100% of the children will now be really ready as defined by best practice. That new human capital to K-12 systems and communities will change everything about local economics, education, emotions and ethics in 5-10 years.

The promotion message is set up within the private sector spending to highlight education reform required and picking a point of reform for both no choice and win/win expectations. After 100 years the grand bargain is finally being distilled and written so it can be followed. It does not violate the concept of the private and public sector because it starts way before the K-12 if required. It naturally goes back to what the private sector knows will work for process and throughput. First things first, right the first time, one size fits one. Use six sigma, if required, and use the theory of constraints improvement processes to reach the goal, if required.

A. Local economic growth is broken. The future for the kids has become uncertain. It is broken because the local school districts leave too many children behind right from the start and All the local players living in an area (private and public) are trapped in structural failure in the schools and now the civil society. **There is no choice other than the grand bargain, and business leadership knows it.**

B. The private sector must promote a real solution without taking over. It has tried and has quit to a major degree; but cannot quit; but has to admit education and economic outcomes are getting worse all the time. Local business can be overrun physically or emotionally based on the lack of relative civil values at any point and civil protection can easily get out of hand with the emotion behind it reported and maybe manipulated or not because truth and honesty has become so relative.

C. Business must promote to expect growth with new local customers. The public sector must spend to produce education and civility. The public sector must produce without creating the gap, disparities and the emotion that there is white privilege in the structures and the futures. These musts are absolutes without the historical foundations to grow within.

There is tribulation in business when the grassroots do not take the grand bargain and run with it. Without the grand bargain the structures will close out the growth potentials, the access to the middle class and civility via traditional normal economic growth. There is no replacement for normal. **The money for the grand bargain exists. The laws to allow grand bargain growth exist. Who will break through the structures with the grand bargain for the kids?**

A grand bargain of some absolute value is required to grow. See [summary](#) and see the [whole discussion](#). Business want to create the 1,000,000 email march for all the reasons inherent in the private sector concepts of growth economics, education, emotions, ethics, liberty, freedom, safety, security, predictability and all other attributes of opportunity success and sharing. The end in mind is the middle class is growing because of proper foundations. The local and regional business will have a growth perspective because of the grand bargain far in excess of that recently demonstrated using more and more money.

These “standard” notations are used between the email of the 1,000,000 email march and the USAVALUE coupon to work for the Grand Bargain Messaging

The Objective

To sell product or service in the private sector or the near private sector.

From The Email

Use the coupon printed from the landing page to our site. It is “nested” with businesses and organizations that belief in first things first.

**See the interesting buttons and other coupons on the site.
Please notice the surrounding consumer public service message**

This unique email is a public service to the citizens in the approximate 10 mile area surrounding 375 Marie Ave East in West St. Paul, Minnesota. The email has been boosted by more addresses to include more consumers as a gift arranged by USA VALUES, LLC. and Cobalt Media Group. A priceless strong belief is being shared –

that early reading skills is first things first before kindergarten in light of the future gaps and struggles for education proficiency being created and reformed.

Please forward this email to anyone you know who can use it. This is serious because at the end of the day every child deserves opportunity. The USA is a land of opportunity because of change and the creative choices in the markets. Small business represents that opportunity, only limited by the imagination of cash flowing choices. The public schools are critical; and are just beginning to focus on first things first, right the first time; and must be encouraged to do so with best practice for the child's and society's good fortune.
