Let us talk about **HOW** the next 80 years of USA civilized life together could be a solution. The idea that 15-20 dots could be connected within the next 30 years to move our nation forward like the last 100 and 200 years is not out of the question. USA VALUES starts with the individual's assets and attributes being part of the private sector; being unique to the world; being proactive with doing real first things first (FTF) within new development; and collectively mooring ourselves to growth, education, economics, emotions, ethics and environment. These connected dots will quickly stop the drift and circles of failing outcomes now preventing growth for half of USA society.

Groups are helpful to spread good but are not adequate to create better and best outcomes. Better and best outcomes are the result of first things first (FTF) continuous improvement work that circles with network connections naturally covering our civic challenges. The primal force ("war footings") is first things first influence to everyone's desire to have more as one individually defines more. Getting more on the individual edge of inputs for progress over time is everyone's direct or indirect human existence. It is relatively true that many would value more early learning delivered by mother above money. More education above more money, etc. More Nominal GDP is a result of more and better-best everything. Spending money on new ideas fuels more growth. More brain mapping with mapping of the Value of Love (unconditional gifting) is part of progress over time. 100 years ago Maria Montessori, a private sector early education giant, called for more study and mapping of Love. Love being the unconditional gifting between a supported mother and child that holds generations to each other.

Boldly our malaise needs the FTF individual lever. Progress within each person's private sector will collect to the Nominal GDP we monitor every day. FTF action as a fulcrum on the many dots to be connected require Socratic agreement as to what is the total system and what is real FTF. Where does society get its first level primal power and value, and might it be hidden in full view by those who have aggregated it.

Boldly the FTF connection of the reported 15 to 20 dots will solve our problems defined to be this:

"To fix crime we have to fix the family, but before we do that we have to fix welfare, and that means fixing our budgets, and that means fixing our civil spirit, but we can't do that without fixing moral standards, and that means fixing schools and churches, and that means fixing inner cities, and that's impossible unless we fix crime. ... As a nation we are in deep denial." Page 2 of the Fourth Turning by William Strauss and Neil Howe published in 1997 by Broadway Books.

Reportedly we are now in the Fourth Turning Crisis to be a decisive era of upheaval where old civic order is replaced with a new lens of order reflecting anew the same western civilization values, assets, attributes and debt. History has the end of the civil war in 1860 and the end of World War II in 1946 as previous Fourth Turnings. A new war exists to connect the FTF 15 to 20 dots (network) to created equal individual starts to life (opportunity) for our age 0-6 children from all walks of life. We are dared to use supported primal force on mother and child to create an equal individual opportunity network at age 6 to benefit everyone for the next 80 years of individual life and beyond. Political correctness would say its not mom's problem but truthful problem solving is always the source of opportunity.

There is hard work to re-engage the psychological prime focus of more for the 100% without deducting opportunity for those who already have it. It will take “war footings” for the private sector to next engage the expectation of better and best outcomes to defeat the urban decay stigmatizing 50% of our population. We bend development to immediate returns to spark more work, more money and more education.

This change to be managed by our civil society will need to focus on the individual. This change is bigger than the Civil War and World War II that was also based on individual expectations of freedom. Importantly, doing First Things First right the first time with our psychological primal force common to all is **HOW** we prepare our age 0-6 children to seek equal opportunity through mom and paid mentor. **I AM ASKING YOU TO READ THIS INTRODUCTION.** This is a national solution to the dilemma’s you describe.

15-20 dots need to be connected for the lives of our children. It draws support from many points, including banking, for the money. This focus is on the individual mom and age 0-6 child who must keep up because the excuse has been removed by the private mentor systems created by the private sector using the banner of independence, the constitution and freedom. You see the highest quality education and influence a mother and child can deliver within the private sector is to be really ready to read, do simple math and have a positive expectation going into kindergarten. Every child can be “equal” in this regard at age 6 from the human brain perspective. “Equality” (implied outcomes rated to be good, better or best) at age 6 would change everything. Think- What would our civic systems produce, if only, 100% of the children were really ready to read, add and subtract and understood positive expectations starting kindergarten. These outcomes are paid for many times over as they fit into the 85-year arc of individual and grouped high-quality continuous improvement.

Mom needs a true gift from the mentor paid by the private sector to get going and not miss the freedom start. Over a 16-year projection every child in 2036 will be ready and every mom will have the influence to create the positive expectation from the public and private sectors of education because of the mentoring. Government is not required because they cannot deliver one size fits one better and best quality. The above is the end in mind and a new civility with a honestly new positive expectation appears without public funding.

The first thing first is to get our target on 20 billion dollars per year from the private sector side of the Federal Reserve Bank (FED) via monetary policy that ultimately becomes real fiscal money. FED actually owes this tactic to the lower and middle classes of the USA under their the banner of fairness. I use the word tactic because the policy is already in place and it only takes 12 of 19 leaders of the FED to decide to do what only they can do and is required by all of us including the elite under the banner of \$NEXT\$. To get to yes, the program meets the requirements for the private sector elites. But, the program leaves the government behind with the private sector’s requirement for better and best early learning. The government can deliver no better than good quality.

These writings (links), are led by an introduction of the how, what, who, why, where, and when.
<http://www.usa-positive-expectations.com/support-files/newpresent.pdf>

Targeting the money is nested within a nominal private sector GDP growing at up to 5% with a risk factor of 10% reducing to 7.5% risk because of the private sector’s delivery of these skills before Kindergarten. Spend the money, record the cost as an asset, gift the assets needed to the USA Treasury

at market value to offset the deficit. Embrace the Scandal of Money described by George Gilder. The 100-year projection will show that the FED, as the private sector's bank, has more money than lower case god. More money than any other nation on earth. Our plan is to engage the private sector, that creates the GDP each year without reference to the government, to agree that a private sector gift to lower and middle class mothers to create equal readiness and influence at age 0-6 is only fair and has sky high ROI. The plan includes a direct effort to influence the FED from the lower and middle in a way it has never been influenced in the past. The why the FED would do this private sector funding of the mentor goes to the creating of reasonable monetary ability to pay the national debt without giving the excess to the government.

We are not asking the government to deliver any more than good quality from its one size fits all Pre-k and child care efforts for the money already being spent. Cutting our expectation from the government to "only good" is like making the separation of the private sector's GDP of 20 trillion dollars and the Federal Budget used by it to make the economy happen fairly, (3.5 trillion dollars) to be real and relevant under the USA Constitution. The elite who need to keep the nation in debt to apply its constraints want to control using a debt to GDP ratio of under 1.0 when they do not want you to know that the Present Value of Future Nominal GDP (PVofPE-FNGDP) at the present 10% risk factor is over 200 trillion dollars now. This "slight difference" makes the federal debt less than 10% of the resources that will come into play when deciding whether it needs to be paid off or not. We know the national debt is not getting paid off and it is about worldwide confidence.

This introduction and plan is against every elite republican, democrat, independent, socialist and capitalist organized or elected or to be elected. So only the private sector is going to make this happen and we are lucky the private sector has a bank and bankers with just about unlimited money as it keeps the faith and trust of the middle class of the USA on the USA dollar as the world currency.

The promotion and influence war will be to monetize the elite banker enough to enter the at risk zone of mother and child to pay for creating the soft assets and attributes of the child's future opportunity and success using a networked mentor organization. That organization by the school, organizations, churches and corporations will be based on the real requirement of readiness at age 0-6.

I can see 2,000 local businesses engaging 250 million private sector citizens and all corporations, organizations and churches in the concept that the FED is our private sector bank. Only it has options to do much more and more will be promoted with an Email March On The FED. The local business will be fully capitalized local memberships and formed to be like what you see at www.usavalues112.com. It will sell the email march to individuals and corporations, advertise, and send the public service message to the communities and the universities. The plan is to fire up at the college and late years of high school to replace the fire for socialism. Early Reading Skills Delivered and housing for when the child's future is being created to be ready for kindergarten are key risk reductions being valued first as the PVofPE-Prek and then leading to the PVofPE-FNGDP growth. We are talking mega dollars for mega ROI'S within the private sector.

The PVofPE-Prek is a concept of present valuing the positive expectation for readiness of a child at age 6. The present value is worst, bad, good, better or best defined mostly by ready to read, doing simple math and having a positive expectation network. The FED will have a receipt for individual PVofPE-Prek block chained and valued in the bank's reserves. This is a PVofPE-FNGDP influencer based on more complete real readiness of the nation. How does the private sector FED use its reserves without releasing it to the

public sector, because the number is huge relative to the national debt and the national annual budget deficit. **Enough said, but there is plenty for you to read following these links.**
